

## SPECIFICATION

Linkable and Modular LED Linear light

Note: LEDYI may change product specifications and installation guidance without prior notice.

## Description

Fast connected LED linear light module for indoor linear auxiliary lighting, widely used in jewelry cabinets ,supermarket shelves ,commodity display cabinets, indoor furniture and other.

1. Modularized ultra-thin and narrow linear light
2. Fast connection without dark area ,no soldering.
3. Super long 6M connection, no brightness attenuation
4. Can provide a variety of lengths, corners and accessories;
5. A variety of installation methods ,including fixed clips, magnetic fixed clips and angle fixed clips.

## Dimensions

Item No.	Dimension	A	B	C	D
LM1213B-100	L100xW12.5xH13mm (L3.94xW0.49xH0.51in)	100mm (3.94in)	103mm (4.05in)	12.5mm (0.49in)	13mm (0.51in)
LM1213B-200	L200xW12.5xH13mm (L7.87xW0.49xH0.51in)	200mm (7.87in)	203mm (7.99in)		
LM1213B-500	L200xW12.5xH13mm (L19.68xW0.49xH0.51in)	500mm (19.68in)	503mm (19.8in)		

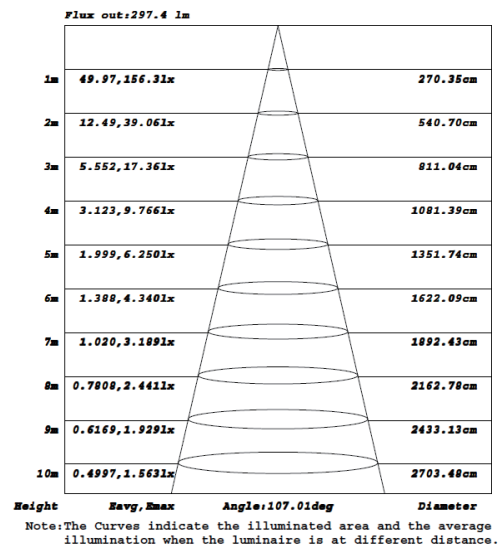

## Parameters(Single color)

## UV Modular

### UV Modular Introduction

LED UV germicidal lamp can be used for daily disinfection of wardrobes, cabinets, jewelry showcases, supermarket shelves, etc. The whole lamp adopts UVA + UVC. LED light source kills bacteria up to 99.9%, and is compatible with the LED modularized linear light to achieve the integration of lighting and disinfection;

1. Modularized ultra-thin and ultra-narrow design, quick soldering-free connection between the sterilization lamp and the lighting lamp to realize the integration of lighting and disinfection;
2. The UVA + UVC LED light source can efficiently kill germs, and the killing rate of Escherichia coli, Staphylococcus aureus and Candida albicans can reach 99.9%;
3. Various installation methods, including fixed base and magnetic fixation;
4. Can be quickly connected with a variety of the lighting modules to meet the requirements of personalized lighting sterilization.

## UC Modular Detail

UVC RF Controller

LED UV Germicidal lamp

Lighting lamp

Remote control

**Warning:** please make sure the controller connected correctly, otherwise controller will be damaged!!

1. Input of controller connect with the driver, output of controller connect to the light
2. White cable connect to negative of driver, Gray cable connect to positive of driver.

### Germicidal Mode

Click the disinfection button of the controller, the lighting lamp turn off, the germicidal lamp turn on and automatically turn off after working for 15 minutes.

### Lighting Mode

Click the lighting button of the controller, the lighting lamp is turned on, the germicidal lamp is turned off

UV Modular Parameters

Item No	LM1213B-200UVC	Bacteria killing rate	irradiate 15min at a distance of 20cm	99.90%
Voltage	DC24V	Life span		10000H
Power	3W	Working environment		-25~45 C
LED Source	UVA+UVC	Waterproof grade		IP20
UV Wavelength	275nm+405nm	Protection grade		III

UV Modular Application

LED UV germicidal lamp can be used for daily disinfection of wardrobes, cabinets, jewelry showcases, supermarket shelves, etc. The whole lamp adopts UVA + UVC. LED light source kills bacteria up to 99.9%, and is compatible with the LED modularized linear light to achieve the the integration of lighting and disinfection.

UCV RF Controller + Remote

**Note:** There have more power supply for your choose ,include input connector's wire length.

## Connection Diagram(Single color)

## Connection Diagram(Tunable White color)

## Key Function

- On/Off: Turn on/off light.
- Color wheel: Touch to change color temperature.
- Bright+/-: Adjust brightness, short press 10 levels, long press 1-6s for continuous 256 levels adjustment. 100%, 50%: Get 100% or 50% brightness directly.
- WW: Get warm white directly.
- NW: Get cool white directly.
- 3 Scene: Short press recall the scene, long press 2s save the current color into the scene. the L .ED indicator will light up longer when save OK.

### Attention:

1. It is strictly prohibited to install with power on and modify or damage the internal circuits and components of the product without permission.
  2. Make sure that all the connection are correct before turning on.
  3. Avoid scratching or bending during installation, which may damage it.
  4. The maximum connection power of one section can't exceed 72W to prevent the defect problem of overload and non uniform luminous effect.
  5. Don't stare at the product for too long time ,it may let you uncomfortable.
  6. Installation, disassembly and maintenance are performed by professional.
  7. Clean the luminaire with only a soft cloth, when there have stubborn dirt, please use soft cloth and neutral detergent to clean.
- Reminder: please do not wash with alcohol or thinner
8. Only strictly following the installation instructions can ensure the product's safety performance, so please keep the instructions.

## Disassembly Module

### Disassembly of the input module

Fix the input module by hand, and turn the lamp body in the direction of the arrow in the figure with the other hand to remove the input module

### Disassembly of the connection module

Fix the lamp body on one side by hand, and turn the lamp body on the other side in the direction of the arrow in the figure with the other hand to remove the connection module
