

FLEXIBLE LED WALL WASHER

LY48-FWA2835W-24-IP67

Specialized LED strip Manufacturer

Product Introduction

- Adopting TPU material, it's resistant to yellowing, high temperature, corrosion, weak acid and alkali, and has great flexibility.
- PU glue is used for filling and sealing, so that it has strong adhesion, good durability and high reliability.
- It can replace the traditional hard wall washer light or LED strip. It's small in size, light in weight, flexible and easy to install.
- Asymmetric optical lens (115°×50°) are available for different applications
- With low voltage DC24V, higher safety factor

Electrical Data

Model No.	LY48-FWA2835W-24-IP67
Input voltage	24V
Power	18W
CRI(Ra)	>90
Beam angle	115x50°

LEDs /m	48LEDs
Working hour	50000h
Working temperature	-25 °C~+45 °C
Cutable length(mm)	125
IP Level	IP67

CCT	2700K ±100K	3000K ±100K	4000K ±200K	6500K ±200K
Lumen/m	1414lm	1564lm	1539lm	1587lm

Light Distribution Curve

Beam Angle 115x50°

Installation Diagram

Installation With back tape

Remove the product from the packaging box and tear off the tape on the back.

Install the product where you need it (ensure the wall is smooth), refer to the installation distance diagram for the specific glowing effect, and stick it firmly.

Connect the product to the low-voltage driver and energize it.

Installation with stainless steel mounting clip

Remove the stainless steel mounting clips and screws from the packing box, and use a screwdriver to install these clips where needed.

Take the light out of the box, then put the light into the clips and secured it (refer to the installation distance diagram for the specific glowing effect).

Connect the product to the low-voltage driver and energize it.

Installation with Silicone Mounting Clip

Place the light where needed, and refer to the installation distance diagram for the specific glowing effect.

Remove the silicone mounting clips and screws from the package box, and fix these clips with a screwdriver.

Connect the product to the low-voltage driver and energize it.

Installation with Aluminum Profile

Remove the light, aluminum profile and rotating brackets from the box, and fix the rotating brackets to the needed position with a screwdriver.

Put the light into the aluminum profile, and press the light down along the profile to ensure the light is tightly stuck into it. Then fasten the profile on the rotating brackets (according to the glowing angle requirements, the rotating bracket can be adjusted).

The specific glowing effect can be adjusted according to the needs of the application. After the installation, connect the light to the low-voltage driver and energize it.

Wiring Diagram

Cautions

Correct operation

During the installation process, the LED wall washer is taken out from the reel naturally and keep it as straight as possible.

The LED wall washer should be kept vertical or horizontal during the installation process.

When LED wall washer meets the corner during the installation process, the LED wall washer must be kept facing up and the back facing down, maintaining a certain bending arc, $\Phi \geq 150\text{mm}$.

Wrong operation

Do not twist the LED wall washer during the installation process.

Do not fold the LED wall washer in half or bend it at a small angle during the installation.

When the LED wall washer meets the corner during the installation process, the LED wall washer must be kept facing up and the back down, and it cannot be bent at right angles.
