

### Product Test Report

Product name:	Sauna light strip RGBW	Testers:	Niu Heng	Test date:	Start: 2022.04.20 End: 2022.04.27
Test items:	High temperature and high humidity test	Type of test:	Reliability test	Sample Size:	2M
1. Test equipment: ZH-TH-80D programmable constant temperature and humidity test chamber					
2. Test condition: the instrument is programmed to set the temperature at 85 °C and humidity at 85% .Cycle Testing 168 hours.					
3. Test requirements: light strip natural spread open into the equipment lighting test					
4. Test record:					
<b>Before testing</b> 			<b>Test parameter setting</b> 		
<b>Testing</b> 			<b>Test complete</b> 		

5. Test results: there were no defects before and after the test:

		19.17	1142	59.55	0.2886	0.3064	8479	67.8	96.90%

6. Conclusion: After 168 hours of high temperature and humidity testing, the light strip showed no electrical defects, with a luminous flux decay of less than 3%. The high temperature and humidity test was passed.
