

FLEX LED SHEET

RGBW

Note: LEDYI may change product specifications and installation guidance without prior notice.

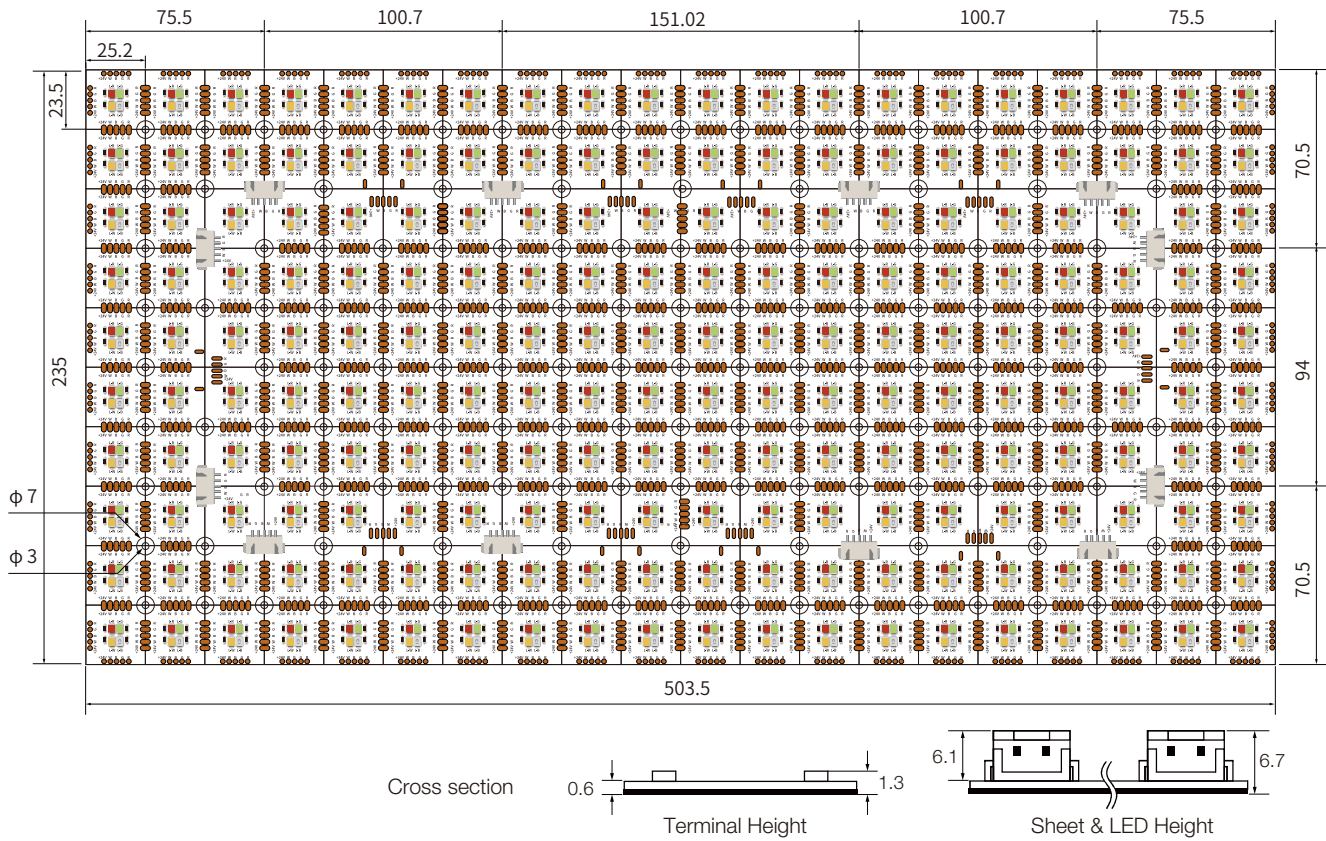

FEATURES

- 24 VDC input
- 90+ CRI
- RGBW
- Highly adaptable design accommodates virtually any application
- LED lifetime of 50,000 hours (L70)
- 3M adhesive backing
- Operating temperature of -4°–113° F (-20°–45° C)
- IP20 environmental rating

APPLICATIONS

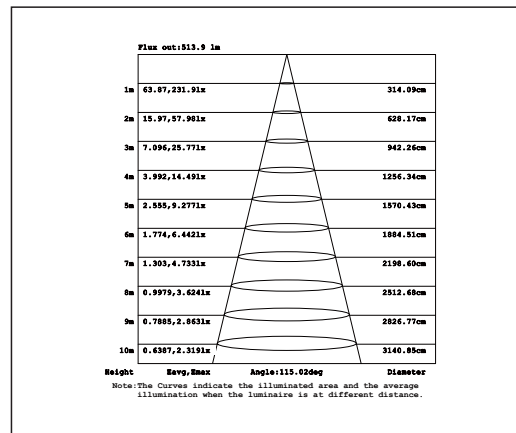

Some common applications include sign lighting, bias lighting, cove lighting, task lighting, backlighting, accent lighting, and under cabinet lighting.

⚠ The maximum overload current of the PH terminal is 5A.
 A single power supply point carries a maximum of 3PCS plates (33W/PCS), and a maximum of 6PCS plates (33W/PCS) in series

Cutting segments

Strip sheets can be cut into many custom shapes. When cutting strips, it is important to use only the pre-marked cut lines on the sheet and also to maintain electrical contact. The images below represent the smallest possible linear routing types. The green box represents strip routing types that work by preserving the electrical connection, and the one in red represents a routing type that will not function correctly due to interruptions of the electrical connection.

LED Sheet Flexibility

Applications

Below are examples of the types of shapes and patterns that can be made and linked as needed to fit nearly any application. The only limiting factor is max run, which can be easily extended by connecting additional power supplies. Additional power supplies can connect to any individual square LED segment anywhere in the run for maximum flexibility.

Applications

Notes

- Before use, please check whether the product has been damaged during transportation.
If it is damaged, please do not install it;
- Please check the voltage range before use, and select the right power supply for use;
- Best working environment temperature: $-20^{\circ}\text{C}\sim+50^{\circ}\text{C}$;
- Best storage environment temperature: $-25^{\circ}\text{C}\sim+60^{\circ}\text{C}$;
It is recommended to install the product in a place with good ventilation and heat dissipation.
- Because the sealed space will affect the heat dissipation of the product;
- Please turn off the power supply during installation, and then turn on the power after installation.
- Do not touch the product during use;
- Pay attention to ESD prevention during installation and use;
It can be used indoors or outdoors according to the different waterproof levels of the product;
- During use, please avoid looking directly at the luminous body with your eyes;
- Please strictly follow the product parameters and instructions when use.
